PROFESSIONAL SUMMARY

Enthusiastic and self-motivated IT professional with over 2.5 years of experience as Server Engineer and proven expertise in mounting, configuring, and maintaining high-performance servers, including hands-on experience with over 512+ ASUS E8 N11 H100 7U servers in a large-scale data center environment. Skilled in operating system installation, RAID configuration, server hardware troubleshooting, and deployment of networking components. Successfully installed and configured more than 500+ NVIDIA network switches, with understanding of data center network architectures. Gained practical knowledge of InfiniBand technologies, BF3 card technologies, and other emerging technologies used in modern server infrastructures. Proficient in leveraging AI tools like ChatGPT and Gemini to optimize workflows and solve technical challenges efficiently. Quick to learn, adaptable, and dedicated to contributing to team and organizational success.

EMPLOYMENT HISTORY

System Engineer – Technical Infrastructure | Aapt TeknoUS

April 2024 – Present

- Implemented and mounted ASUS H100 supercomputing AI 7U servers, ensuring efficient setup and configuration.
- Installed over 500+ NVIDIA switches, supporting high-performance environments.
- Troubleshoot server hardware issues and performed RAID configuration.
- Configured OS and networking from server end based on client requirements.
- Monitoring total 513 ASUS H100 servers Linux based with full control access.
- After sales support for ASUS products. Includes conducting Regular hardware health checks, Server-hall temperature monitoring, Hardware Trouble shooting and Replacements to ensure optimal server performance.
- Utilizing BMC (Baseboard Management Controller) and other remote tools for remote server access, diagnostics, and troubleshooting.
- Creating and maintaining comprehensive documentation for server inventory, configurations, and Standard Operating Procedures (SOPs).

Client: OneXtel.

■ Performed server troubleshooting and hardware replacement for Dell enterprise servers, ensuring minimal downtime and optimal performance.

■ Installed and mounted network switches in high-performance environments, supporting robust data center and enterprise network infrastructure.

■ Conducted operating system installations and configured network settings on servers in accordance with specific client requirements and best practices.

Client: Experian.

■ As per the planned activity, we performed an upgrade of the switches by replacing the existing ones with new models. The new switches are equipped with higher-speed SFP connections, which are now connected to the database servers to enhance performance and throughput.

EDUCATION

Bachelor of Science: Visual Communication

KL University, Vijayawada | May 2021

SKILLS

Linux, Server Installation & Configuration, Server Troubleshooting, AI Tools for IT Support, RAID Setup & Management, Rack Stacking.

LANGUAGES

English, Telugu
